Frontend Task

Google form link - Click here

Submission Deadline: 05th October, 2026

Task Overview:

You are required to develop a responsive website based on the design provided in the attached files. The design includes various components, layouts, and styles that need to be implemented to create a fully functional and visually appealing website.

Design Files:

Please download and review the design files to understand the layout, color scheme, and components.

Link for Frontend Task - Click here

NOTE : You are allowed to use any other assets and add any creative additional elements to your project as long as the layout and the core of the website is not misinterpreted.

Requirements:

1. **HTML/CSS/JS:**
   Use HTML, CSS, and JavaScript to implement the design. You are free to use any libraries or frameworks like Bootstrap, React.js, Vue.js etc., as needed.
2. **Interactivity:**
   Implement interactive elements as specified in the design, such as buttons, navigation menus, sliders, etc.
3. **Responsive Design:**
   The website should be responsive and work seamlessly on various devices, including desktops, tablets, and smartphones.
4. **Compatibility:**
   Ensure cross-browser compatibility (latest versions of Chrome, Firefox, Safari, and Edge).
5. **Performance:**
   Optimize the website for performance, considering factors such as image optimization, code minification, and lazy loading
6. **Accessibility:**
   Follow best practices for web accessibility to ensure the website is usable by people with disabilities.
7. **Code Structure:**
   Maintain a clean and organized code structure. Use appropriate comments to explain complex sections of code.
8. **Git Repository and Deployment:**
   - Create a Git repository for your project and regularly commit your code. Include a README.md file with instructions on how to run your project locally.
   - Deploy the application in any platform of your choice like Netlify, Firebase or Vercel etc.,
9. **Submission:**
   Submit your project by **05th October 2026** in the provided form. Provide a link to your Git repository, Deployment and any additional instructions if necessary

- **Submission Form:** [Click here]

Evaluation Criteria

Your submission will be evaluated based on the following criteria:

- **Creativity:** How creatively your implementation interprets and enhances the provided design.
- **Code Quality:** The cleanliness, organization, and readability of your code.
- **Functionality:** The correct implementation of interactive elements and overall functionality.
- **Responsiveness:** The effectiveness of your design across various screen sizes and devices.
- **Performance:** The efficiency and speed of your website.
- **Accessibility:** Adherence to web accessibility standards.

Important Notes:

- If you have any questions or need clarification on the design or requirements, feel free to reach out to us via email teamdcs.web@gmail.com
- We encourage you to be creative and showcase your skills. Don't hesitate to add your own touch to enhance the user experience.

Best of luck with your task!
We look forward to reviewing your submission.

Regards,
Web Cluster,
DCS.
